

Produced exclusively by

Established over 40 years ago, Blagdon are committed to producing a comprehensive range of high quality, easy to use, pond equipment. An ongoing programme of research and development ensures excellent performance and value for all their customers. This product excellence is demonstrated by Blagdon's award winning range of water gardening equipment. As a result Blagdon's reputation for quality is unrivalled amongst experienced pond gardeners and retailers alike.

GUIDE TO

Aquagarden Pond Pumps for Fountains and Features 850/1200

GUIDE TO

Aquagarden Pond Pumps for Fountains & Features 850/1200

Congratulations on buying an Aquagarden Pond Pump for Fountains and Water Features. Aquagarden pumps are high quality pumps manufactured with advanced technology, to run pond fountains and water features.

The powerful motors are easy to maintain having a single moving part impeller system featuring highly wear-resistant ceramic shaft design.

IMPORTANT

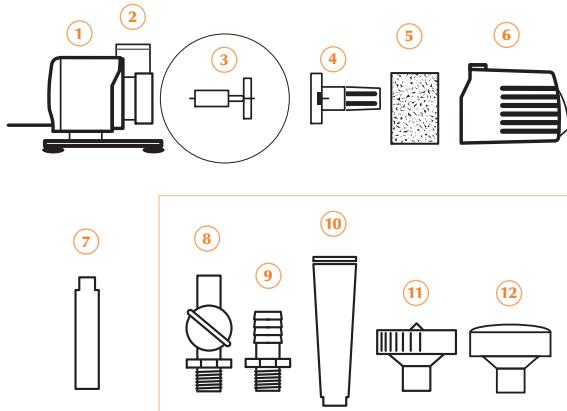

**Please attach proof of purchase to this manual
and file in a safe place.**

GETTING TO KNOW YOUR AQUAGARDEN PUMP

Fountain pump 850

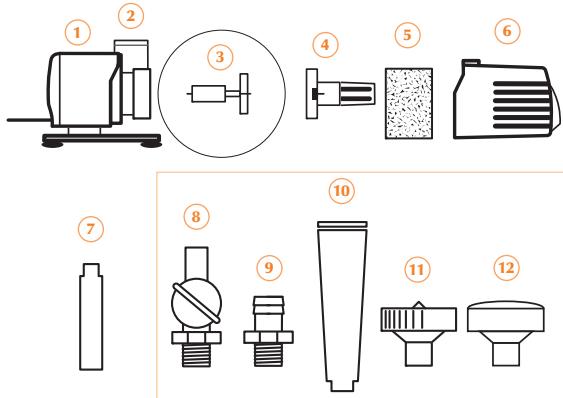

For spares for your Aquagarden product select compatible Blagdon spare part numbers

No.	Pond pump 850 Part Description	Blagdon Code
1.	Pump motor unit	N/A
2.	Pump outlet	N/A
3.	Impeller complete	1017800
4.	Impeller cover	1017688
5.	Pre-filter foam	1017862
6.	Pre-filter cage	1017688
7.	Fountain extension pipe	1017749
8.	Fountain feature flow control	1017756
9.	1/2 inch threaded hose adaptor	1017756
10.	Water bell	1017756
11.	Daisy super	1017756
12.	Daisy	1017756

Parts 3 to 12 are supplied as one package.

GETTING TO KNOW YOUR AQUAGARDEN PUMP

Fountain pump 1200

For spares for your Aquagarden product select compatible Blagdon spare part numbers

No.	Pond pump 1200 Part Description	Blagdon Code
1.	Pump motor unit	N/A
2.	Pump outlet	N/A
3.	Impeller complete MK 2	1017817
4.	Impeller cover MK2	1017695
5.	Pre-filter foam MK2	1017879
6.	Pre-filter cage MK2	1017695
7.	Fountain extension pipe	1017749
8.	Fountain feature flow control	1017763
9.	3/4 inch threaded hose adaptor	1017763
10.	Water bell large	1017763
11.	Daisy super	1017763
12.	Daisy	1017763

Parts 8 to 12 are supplied as one package.

GETTING TO KNOW YOUR AQUAGARDEN PUMP

Hertz	50Hz	50Hz
Watts	7	18
Safety Rating	IP68 CE	IP68CE
Maximum Depth	1 metre	2 metres
Maximum Lift	1.25 metre / 3'3"	2 metres / 6'6"

INSTALLATION

Electrical installation

The power supply must meet the specifications on the product.

The pump is intended to be used with either a weather-proof cable connector or permanently connected to the fixed wiring in the main system other than by means of a plug and socket.

The cores in the supply cable are coloured in accordance with the following code: **Brown = Live, Blue = Neutral, Green/Yellow = Earth.**

The electric cable is permanently connected and sealed in the motor body. If the supply cable is damaged the pump must not be used.

Do not use the supply cable to lift the pump as this may cause damage.

WARNING - THIS PUMP MUST BE EARTHD

A Residual Current Device (RCD), also known as the Residual Current Circuit Breaker (RCCB), with a tripping current not exceeding 30mA must be installed in the supply circuit.

A means of disconnection from the supply having a contact separation of at least 3mm in all poles must be incorporated in the fixed wiring.

For permanent installations to the mains supply, it is necessary to conform to the regulations of the local electricity authority and this would include the use of a metal or plastic conduit to protect the cable.

Attention has been drawn to the fact that special rules may exist concerning the installation of your pond pump (i.e. local building regulations).

These pumps must not be used in swimming pools, or areas where people are in contact with the water.

Always disconnect the mains electricity supply whilst the equipment is being installed, repaired, maintained or handled. Consult a qualified electrician if in any doubt about wiring this product to the main supply.

Warning - The Aquagarden pump is provided with a thermal cut out that temporarily switches off the pump in case of overheating and the pump may automatically restart.

Never run the pump out of water as this may cause irreparable damage.

INSTALLATION

Locating your Aquagarden pump

The Aquagarden pump should be located on a firm and level base in the pond/water feature in a depth of at least 10cm, but no more than 1m (850) 2m (1200).

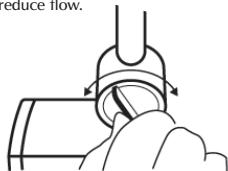

It is advisable to keep the pump off the bottom of the pond to avoid silt entering the pump causing excessive wear and increasing pre-filter cleaning.

Fountain

Make sure there is ample cable from mains supply. Place pump in desired location. Add Fountain extension pipes so fountain head is above surface of the pond. Fountain height can now be adjusted, see 'Adjusting flow control' diagram below. See "Getting to know your Aquagarden" for parts and descriptions.

ADJUSTING FLOW CONTROL

Turn clockwise to increase, anti-clockwise to reduce flow.

BELL FOUNTAIN

Adjust bell by moving head higher for small bell and lower for a wider bell shape.

Tip: Ensure that any fountain or feature fitted does not empty water out of pond/water feature.

Water Feature

Install as for Fountain. Depending on water feature to be supplied, your Aquagarden can be used with the flow control and the 1/2" hose fitting or 3/4" hose fitting (not supplied with 850 model) which can be screwed directly into pump body. Hose clips should be used to secure hose.

Tip: The larger 3/4" hose will give maximum performance when fitted to the 1200.

MAINTENANCE & CLEANING

Warning - Failure to carry out routine maintenance leaving the pump under reduced or no flow conditions for long periods (i.e. blocked pre-filter) will result in a shorter pump life and will invalidate the guarantee.

Aquagarden pump 850 and 1200 are centrifugal pumps with a magnetic impeller movement driven by a watertight synchronous motor. They require minimum cleaning, only periodic cleaning of the pre-filter and impeller is necessary.

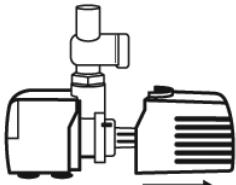

Routine Maintenance

Carry out routine maintenance when pump flow is visibly reduced.

1. Switch off electricity.
2. Remove pump from pond (do not use the cable to lift the pump).
3. Follow steps 1 and 2.

STEP 1: PUMP 850 (ROUTINE)

Firmly pull pre-filter cage from pump motor.

STEP 2: PUMP 850 (ROUTINE)

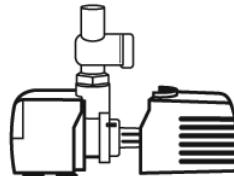

Remove pre-filter foam, and wash thoroughly in fresh water.
A blocked foam will reduce the pump flow rate.

MAINTENANCE & CLEANING

STEP 1: PUMP 1200 (ROUTINE)

Firmly pull pre-filter cage from pump motor.

STEP 2: PUMP 1200 (ROUTINE)

Remove pre-filter foam, and wash thoroughly in fresh water.
A blocked foam will reduce the pump flow rate.

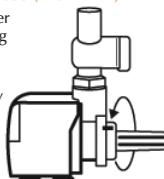

Monthly Maintenance

Following as for Routine Maintenance (steps 1 and 2) and then steps 3, and 4 (3 and 4 - 1200 model).

STEP 3: PUMP 850 (MONTHLY)

Remove impeller cover by turning anti-clockwise to release lock.
Then pull firmly away from pump motor.

STEP 4: PUMP 850 (MONTHLY)

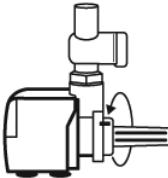

Remove impeller from pump motor.
Wash parts with fresh water carefully.

MAINTENANCE & CLEANING

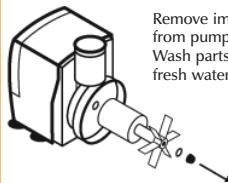

STEP 3: PUMP 1200 (MONTHLY)

Remove impeller cover by turning anti-clockwise to release lock. Then pull firmly away from pump motor.

STEP 4: PUMP 1200 (MONTHLY)

Remove impeller from pump motor. Wash parts with fresh water carefully.

Annual Maintenance

Dismantle pump and examine all parts for wear or damage, replacing any parts that show obvious wear and/or damage. (See getting to know your pump for parts/description and replacement parts codes.) Particular care should be taken to examine the cable entry point and the cable; if there is any sign of damage the pump should be discarded.

Winter Storage

The pump can be run in the pond during the winter but care should be taken to ensure that it is fully immersed and cannot freeze solid. If the pump is not used during the winter, follow annual maintenance procedure and store frost-free in the house or garage until spring.

TROUBLESHOOTING

Problem

Low flow from pump

1. Follow routine cleaning procedure if no improvement.
2. Follow monthly cleaning procedure.
3. Ensure pipe work is not blocked, leaking or is laid so that it gets crushed or kinked.
4. Keep the height that water is to be pumped from the water surface (called Head) to a minimum. The higher the head the lower the flow rate and the more wear on the pump.
5. Use the largest diameter, smoothest bore pond hose over the shortest distance and keep hose fittings to a minimum. This removes frictional loss of flow and so increases pump flow rates.

Poor Fountain performance

- Reduced height.
 - Jets blocked.
- Clean flow adjuster and fountain head. Wash under a tap or hose. Blagdon Pond Pump Cleaner should be used to remove lime scale build-up/waste (see diagram) for improved results.

DAISY
To clean, remove head and rinse.
Or in hard water areas, use Pond Pump Cleaner.

No flow from pump

1. Check power supply is on.
2. Check fuse and wiring (SEE ELECTRICAL INSTALLATION).
3. Follow low flow procedure as above.

If none of the above works contact Interpet (Blagdon) Consumer Advice Department (See Faults problem procedure Page 12).

IMPORTANT

FAULTS - PROBLEMS PROCEDURE

Before returning your Aquagarden pump to your dealer or contacting our Consumer Advice Department, please carry out the following steps. This will solve most problems quickly and easily.

- 1.** Ensure electrical procedure has been followed fully. Check fuse and any cable connectors/switch boxes.
NOTE: If the pump has overheated the thermal overload will temporarily switch off the pump.
- 2.** **(a)** Follow routine maintenance and check pump. **(b)** Follow monthly maintenance and check pump. **(c)** Follow troubleshooting guide. **(d)** Follow annual maintenance guide.
- 3.** Return pump to point of purchase for inspection and advice (You may need proof of purchase).

Consumer Advice contact details

Interpet (Blagdon) Consumer Advice Department

Vincent Lane, Dorking, Surrey RH4 3YX

Telephone: 0845 226 7437

GUARANTEE

This product is guaranteed against defects in material and workmanship for 2 years from the date of purchase, under normal usage. **The guarantee DOES NOT APPLY in case of improper use**, negligence, lack of maintenance or accidental damage either to the pump or to the impeller or impeller shaft. If the pump fails due to a manufacturing fault within this period it will be either repaired or replaced free of charge. Liability is limited to replacement of the faulty product only, no other costs will be reimbursed.

This guarantee is not transferable and does not affect your statutory rights. This guarantee does not confer any rights other than those expressly set out above. Excludes the sponge pre-filter, which should be replaced every six months and the impeller, which may require replacing annually. If any parts need replacing, spares are available from your retailer.

Environment friendly disposal

You can help protect the environment! Please remember to respect the local regulations: hand in the non-working electrical equipments to an appropriate waste disposal centre.
